PROJECTS:

1: Glass Shop

[Live Site](#) [Client-Site Code](#) [Server-Site Code](#)

- Build front-end with JavaScript/React/Tailwind and others packages. And developed backend and database with Node.js/Express/Mongo dB atlas.
- Implemented dual dashboard for admin and user (to see admin panel login with: admin@admin.com/123456).
- On the user dashboard they would be able to view & delete their previous ordered product. And also, all give their feedback on the "Add Review" page.

2: Knock Knock Service Center (KKSC)

[Live Site](#) [Client-Site Code](#) [Server-Site Code](#)

- JavaScript/React/MongoDB based goods delivery site implemented also firebase authentication
- Simple error handling while user wants to signup/sign in. Users data store in MongoDB atlas through node.js/express rest API.
- User can create signup/sign in and see their orders on the "My Order" page.

3: GetWell Clinic Center (GCC)

[Live Site](#) [Client-Site Code](#)

- Front-end targeted clinic center web application which authentication accomplished by firebase and also handled basic errors.
- User can able to register/sign in with third-party providers Facebook & Google.
- Private protected route designed and good user experience focused.
